Veritas® Panel Platform Kit

If you use a circular saw, you need this kit. The assembled platform is flat and stable, with sacrificial cross-rail supports that let you rip or crosscut material without worrying about your blade contacting the surface beneath. You can work with confidence on any flat surface, indoors or out. It's so stable, you can kneel right on sheet goods while you make your cut – no more stretching or stooping, and it's easier to follow your line accurately.

Portable, storable and effective, this kit will change the way you work.

Nylon bag

12 screws

12 saddles

Saddles are molded from resilient polypropylene that can stand up to plenty of hard use but won't damage tool edges.

Portable

1 minute set-up

Use on any flat surface

Use 1×3 lumber to create a stable cutting platform

Cross-rail supports are sacrificial

Workpiece and offcut are fully supported throughout the cut, improving control
